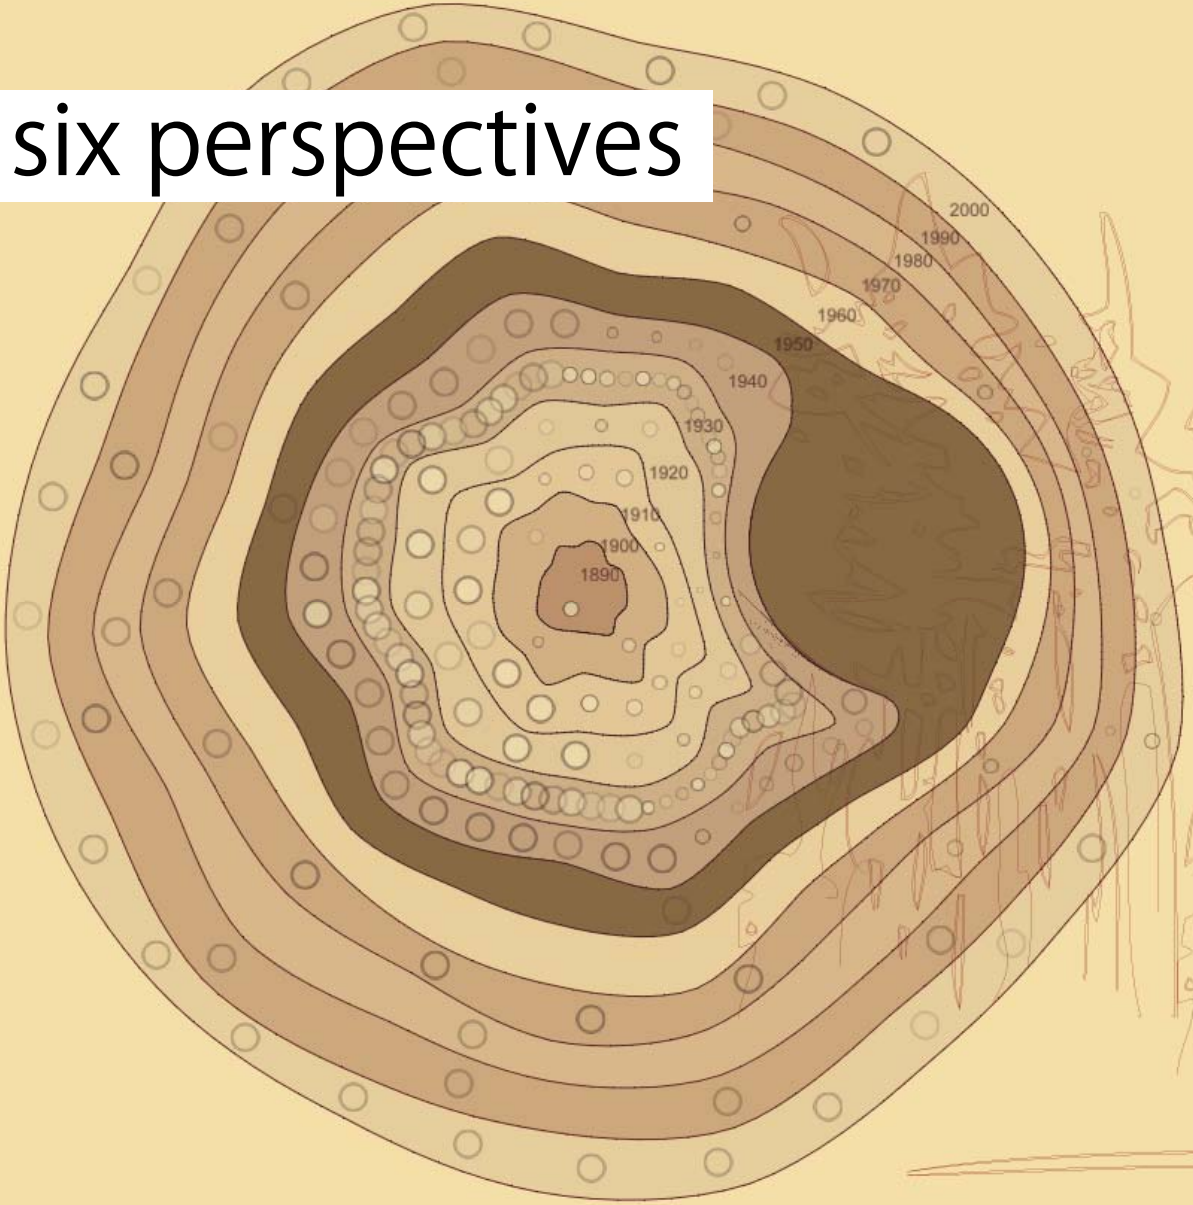
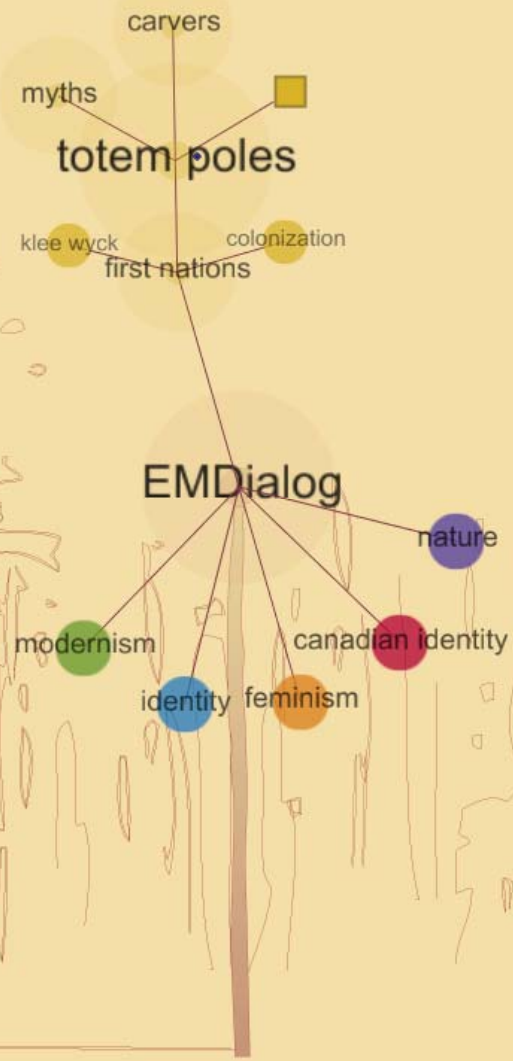
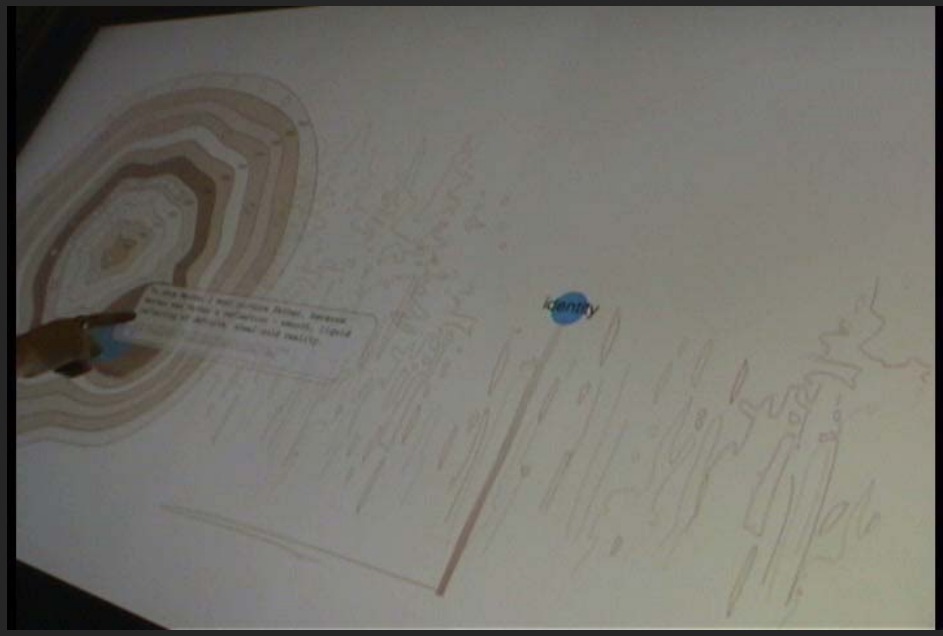
jungle
nature

six perspectives





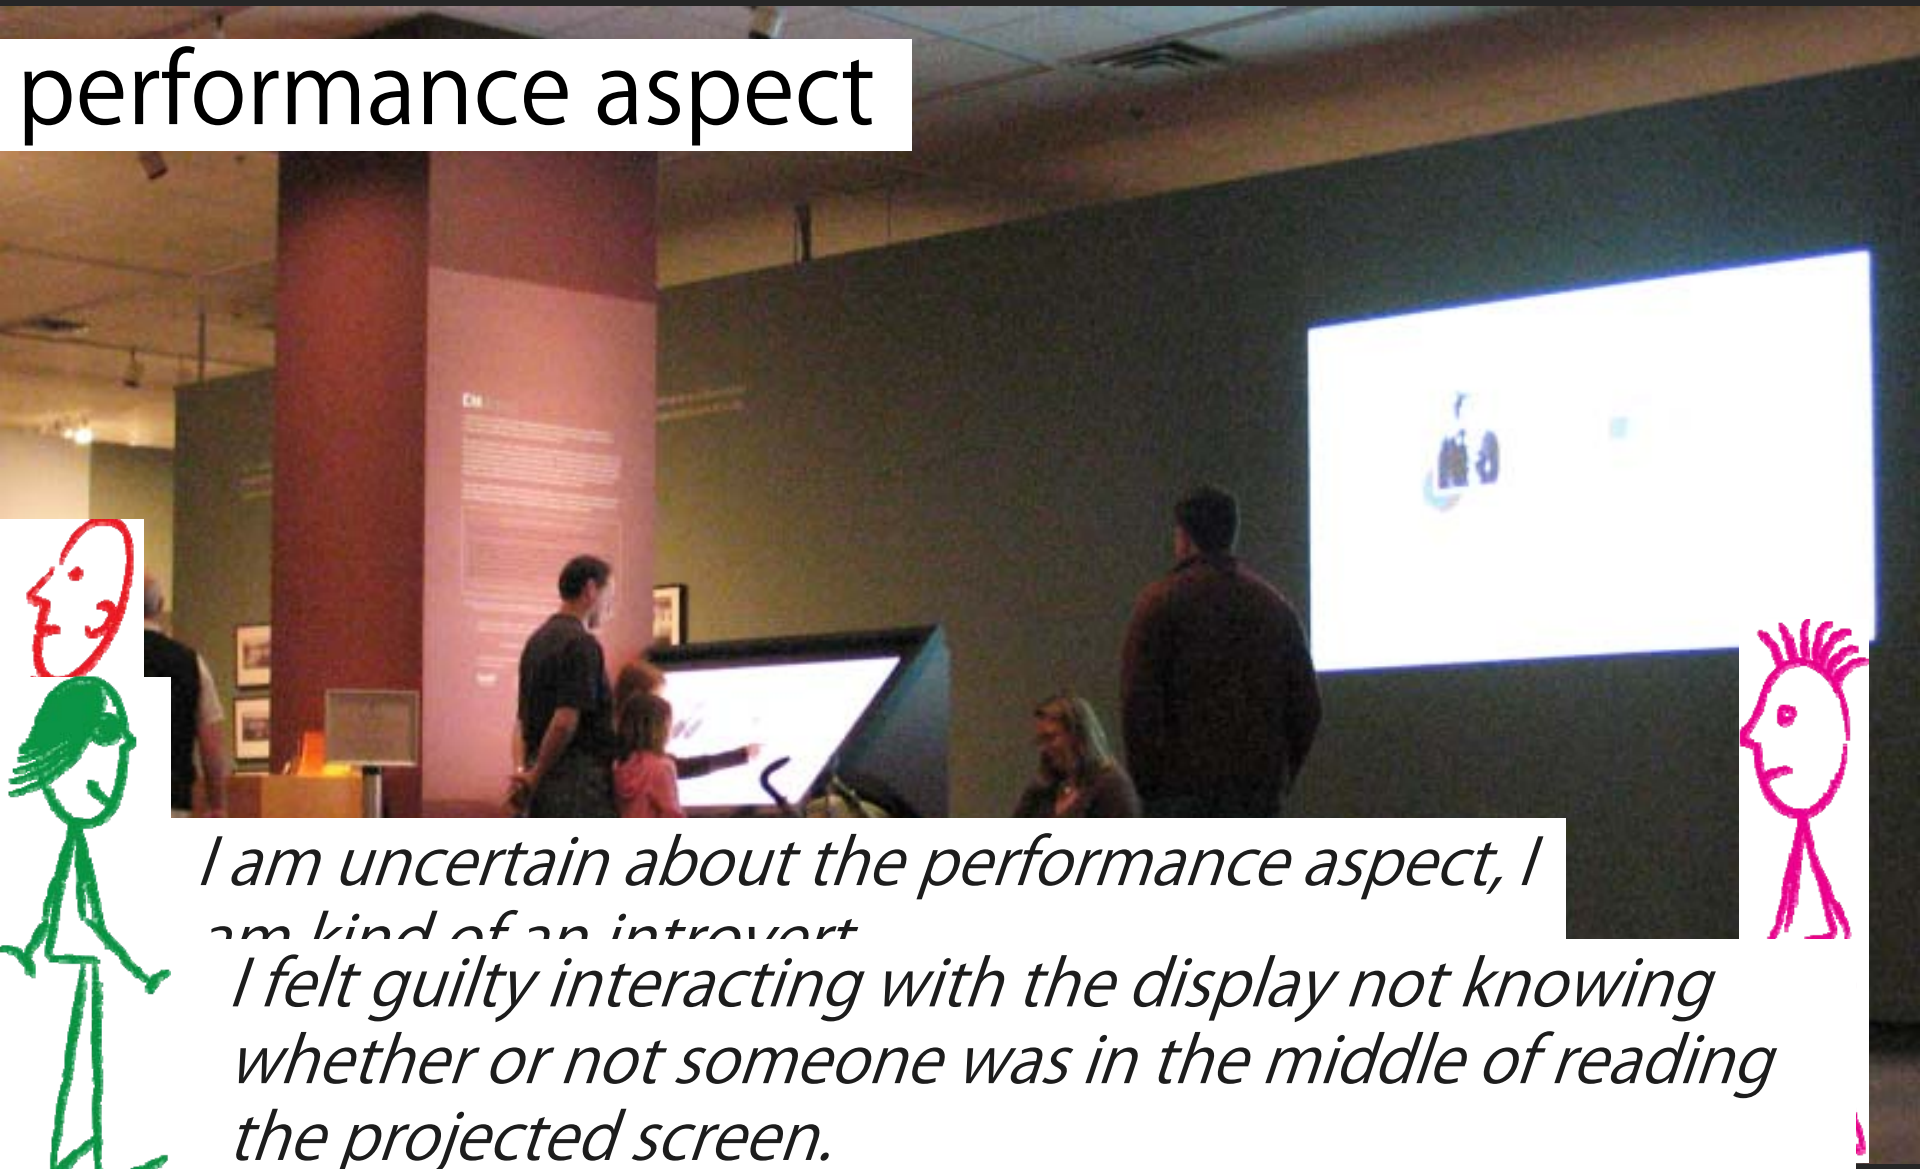
Self Portrait (1938)



identity

motivations for approach

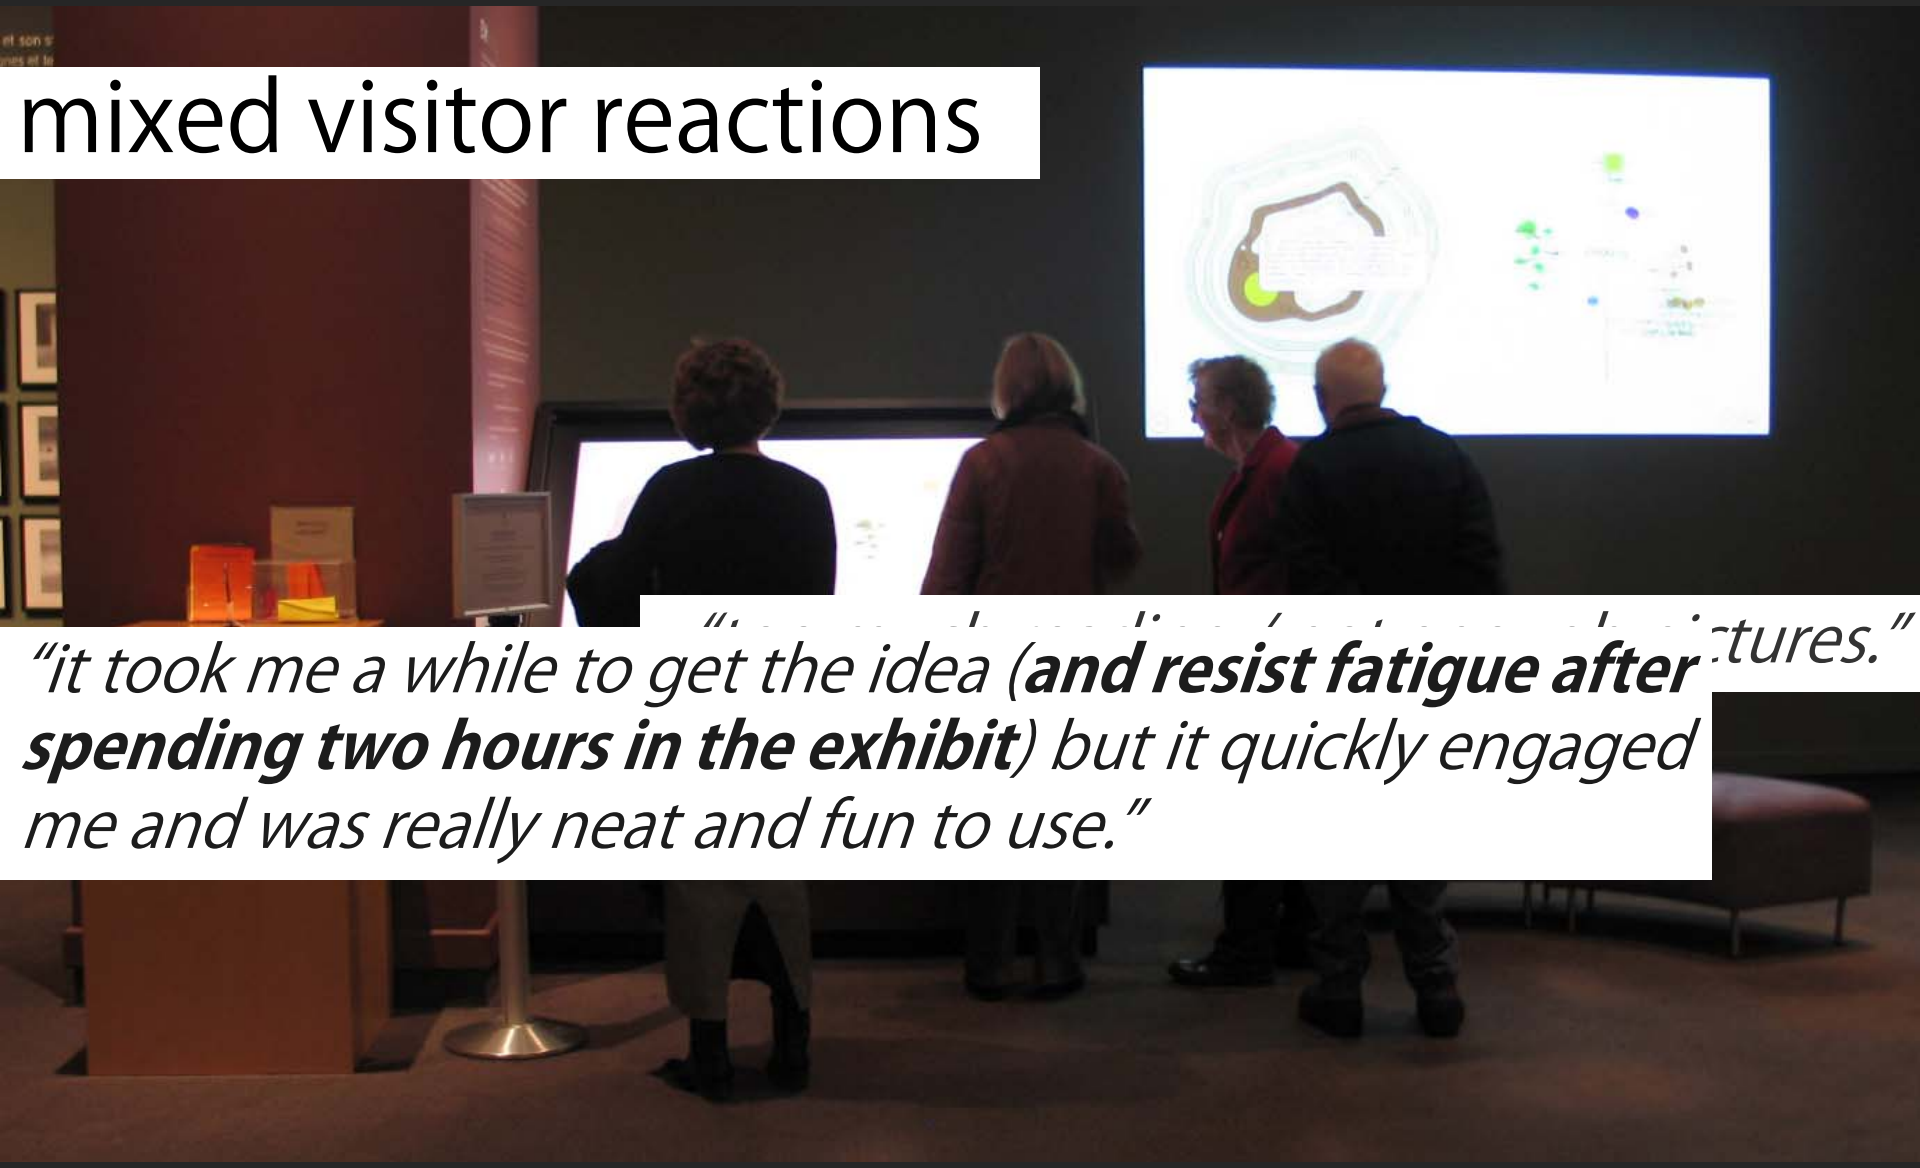
performance aspect



I am uncertain about the performance aspect, I am kind of an introvert

I felt guilty interacting with the display not knowing whether or not someone was in the middle of reading the projected screen.

mixed visitor reactions



*"it took me a while to get the idea (**and resist fatigue after spending two hours in the exhibit**) but it quickly engaged me and was really neat and fun to use."*

lessons learned

aesthetics matter

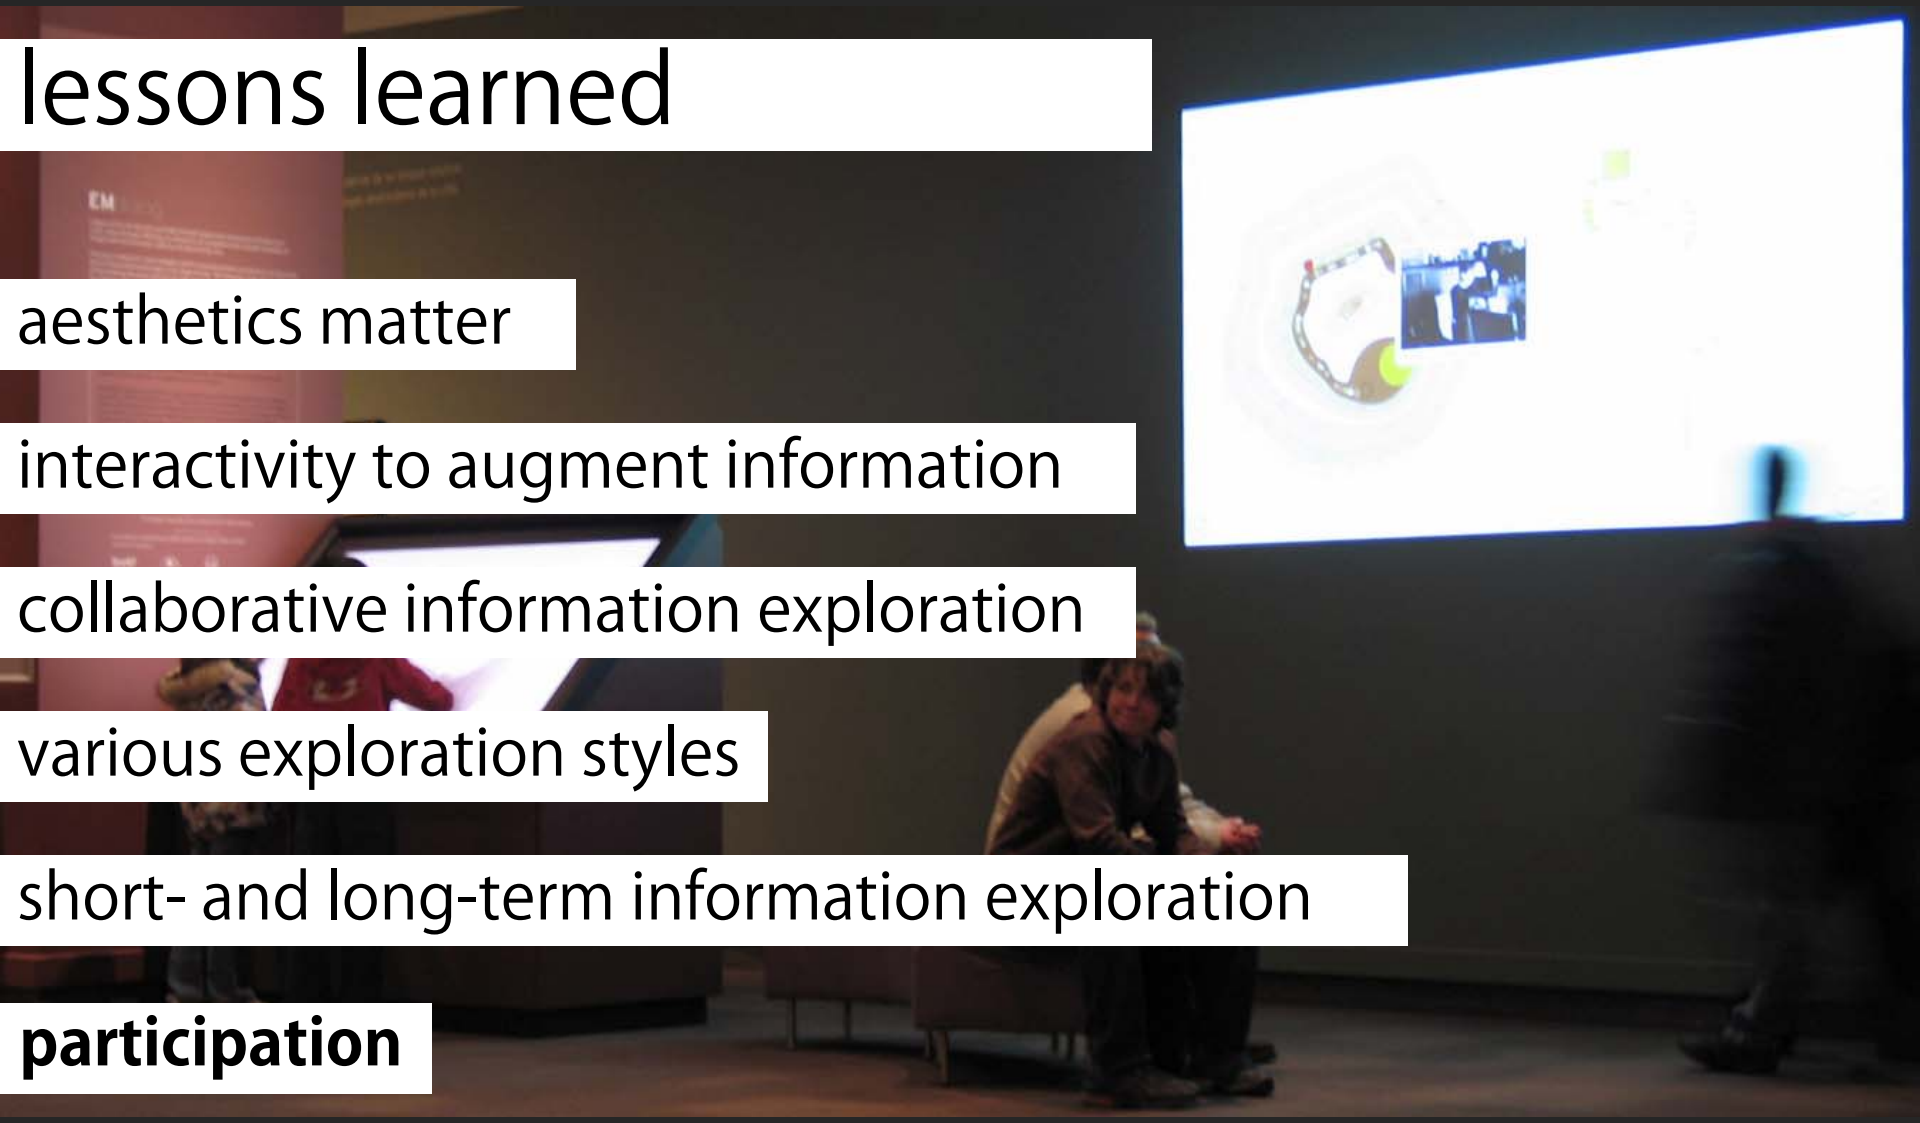
interactivity to augment information

collaborative information exploration

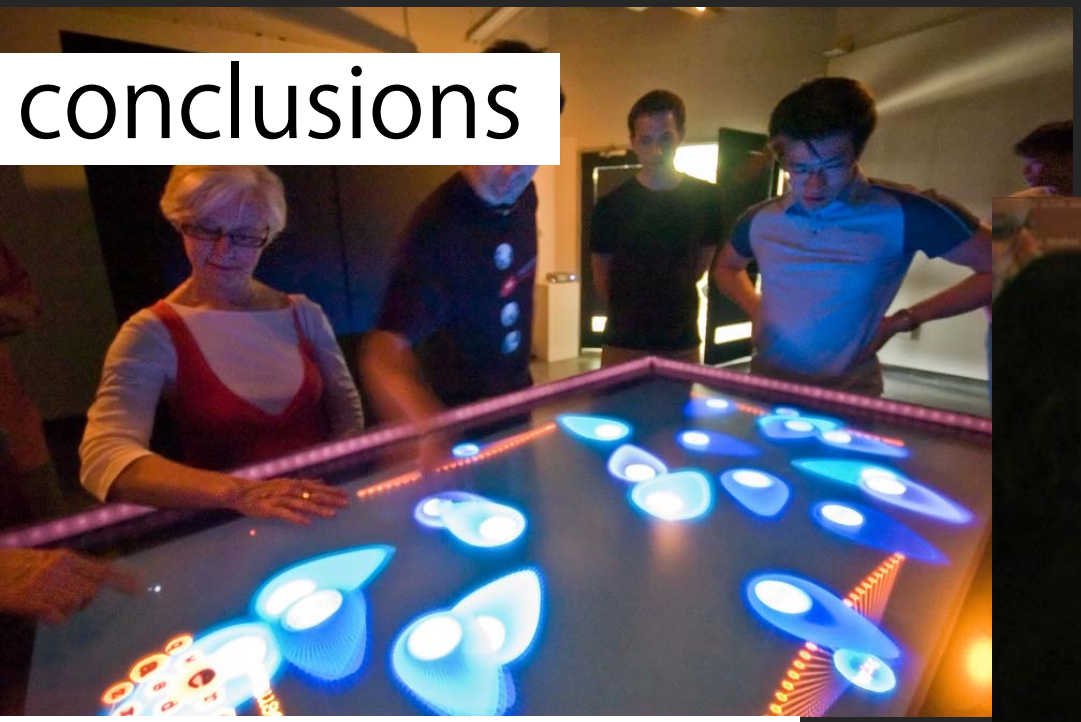
various exploration styles

short- and long-term information exploration

participation



conclusions



social context of space

dynamic vs. static data visualization

participation

outlook

participation & public large-display infovis

interdisciplinary research & collaboration

creative process
